### **General relativity in terms of differential forms**

November 10th, 2018 - It was Cartan who developed General Relativity in his book ON MANIFOLDS WITH AN AFFINE CONNECTION AND THE THEORY OF GENERAL RELATIVITY relying only on Affine Connections it is not clear to me what to be called a formulation of General relativity in terms of differential forms but I take it granted from the question that one is trying to develop a theory using index free notation and keeping in mind Christoffel Symbols are fundamental building blocks in deriving Field equations
